Team Performance

Goal:
Identify on which subtask the most productive team put most of their time.

How:
You will presented with horizontal bars. The bar length represent the total amount of work done by a team.

Each bar is sub-divided in smaller sections. The width of the sections represent the total work spent on that area.

Larger section equals more work.

Hover over the '?' in the top left corner if you want to read this again after starting the task.
